

**The Critical Thinking Co.™ announces the release
of *Mathematical Reasoning*™ Level C**

Seaside, CA — August 17, 2007 —The Critical Thinking Co. is pleased to announce the latest addition to its family of educational book and software, *Mathematical Reasoning Level C*.

Mathematical Reasoning Level C provides a full curriculum for second graders, with an emphasis on mathematical reasoning (problem solving). The book's entertaining and engaging exercises teach the mathematics concepts and skills students are expected to know in second grade. It also introduces several skills and concepts normally taught in third grade.

The highly effective activities take students far beyond drill-and-practice by using step-by-step, discussion-based problem solving to develop a conceptual bridge between computation and the reasoning required for upper-level math.

The activities and units in *Mathematical Reasoning Level C* spiral slowly, allowing students to become comfortable with concepts but also challenging them to continue building their math skills.

About The Critical Thinking Co.™

For over 35 years, The Critical Thinking Co. has been the recognized leader in teaching thinking. The company offers fun, easy-to-use products that develop a wide-range of thinking skills and improve standards-based learning in reading, writing, math, science, and history. The company's award-winning books and software empower students with the problem-solving skills needed for success in school and in life. The Critical Thinking Co. guarantees better grades and higher test scores, or your money back!
