January 2008

Dear Prospective Reseller:

Thank you for your interest in our unique products. To qualify for a reseller's wholesale account with our company, you must have at least three of the following.

- An approved educational products store
- An approved mail order catalog for educational products (minimum mailing of 1,000; copy of catalog required)
- A resale license for your state or a business license for your locale, indicating that you sell general educational products and pay state or local licensing fees or sales taxes (copy required)
- Evidence that you sell or have resale arrangements with other educational publishers. (Account numbers and/or contact names required)
- Membership in a professional booksellers' organization (NSSEA or ABA)

Please note that home-based businesses do not normally qualify as standard resellers. These requirements are designed to protect our direct sales business as well as our legitimate educational supply distributors and retailers from unfair competition.

If you have questions about our criteria or our products, please do not hesitate to contact us.

Sincerely,

Resale Marketing Department
